

Slot	Question
"pizza_type"	"What specialty pizza would you like?"
"pizza_size"	"What size? (small,medium,large)"
"pizza_crust"	"What type of crust?"
"order_delivery"	"Pick-up or delivery?"
"order_address"	"What is your address?"
"order_name"	"Can I get a name for the order?"
"order_phone"	"Can you give us a phone number?"
"confirmed"	"Got your order. Is this correct?"
"wrong_info"	"I'm sorry, tell me what you'd like instead."
"reorder_pizza"	"What's a good phone number to reach you at?"
"order_wait"	"Would you like to see your estimated wait time?"

Our system is able to take some dynamic input but expects certain input for some fields.
How to use our system:

- cancel
In order to cancel, type cancel at any time
- repeat
Repeats the last thing the machine said
- querying for order status
In order to query your order status, type status. Currently it prompts for a phone number, only 1234567890 works right now.
- ordering a single specialty pizza:
Specialty pizzas → ["vegan", "hawaiian", "meat lovers", "4 cheese", "pepperoni", "veggie supreme"]
Sizes → ["small", "medium", "large"]
Crusts → ["thin", "regular", "gluten-free", "deep-dish"]
Names → ["Jessica", "Devin", "Alex", "Alexandra"]
- reordering the preferred order
Type reorder at anytime to reorder. Currently the only account we have corresponds to the phone number 1234567890
- provide information out-of-turn or out-of-order
You are able to type multiple pieces of information at once as well as in any order, the system will prompt you for what it still needs.
- revise previous information
You are able to change anything within the keywords listed above at any time.
i.e.) I want a hawaiian pizza → Oh wait I want a vegan
This will change your pizza from hawaiian to vegan
- reject previously provided information
You can type start-over at any time to start-over.
The system also confirms your order with you, to which you can type no and reject that information.
You can also reorder and reject the information that was saved.
